

APP GUIDE · ऐप गाइड · OCTOBER 2026

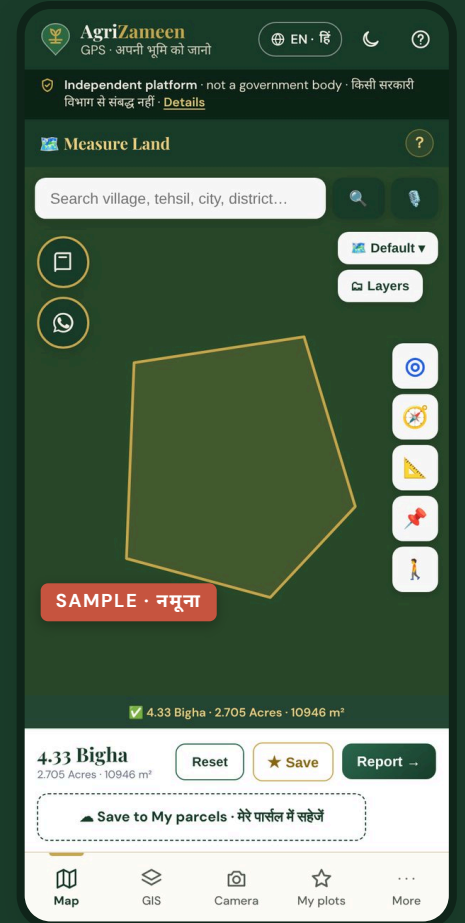

AgriZameen GPS

अपनी भूमि को जानो · Know your land

Measure your land on the map, stamp GPS photos, read a land report and keep every plot in one place — free, in English and Hindi.

नक्शे पर ज़मीन नापिए, GPS फ़ोटो लीजिए, ज़मीन की रिपोर्ट पढ़िए और हर प्लॉट एक जगह रखिए — मुफ्त, हिन्दी और अंग्रेज़ी में।

On Google Play as **AgriZameen GPS**, and in any browser at agrizameen.com/agrizameen-gps-app/ · An independent land information app by Vision Global Ventures LLP, Jaipur — not a government body.

Measure Land, with a SAMPLE outline · नमूना

Five tabs, one look across the AgriZameen apps

पाँच टैब, हर AgriZameen ऐप में एक जैसा रूप

Five tabs at the bottom

Map, GIS, Camera, My plots and More. The land report (Overview) and the Converter sit under More, with Help & FAQ.

नीचे पाँच टैब — रिपोर्ट और कन्वर्टर “More” में।

EN · हिं in the header

One button changes the language. The app's own labels come in seven languages — English, Hindi, Marathi, Gujarati, Punjabi, Tamil and Telugu.

एक बटन से भाषा बदलें।

Light or dark

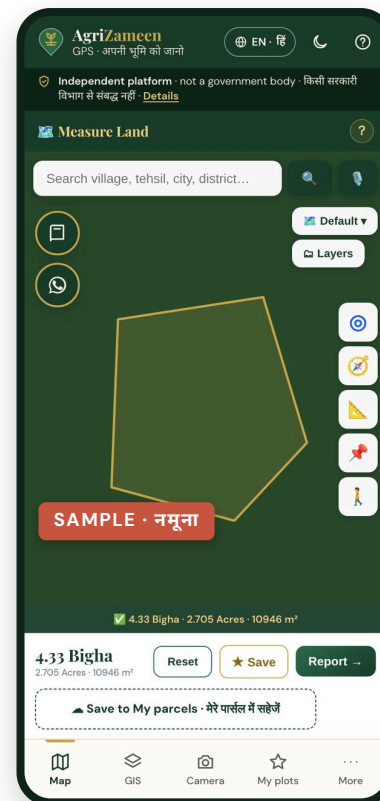

The moon button switches to a dark theme, and the choice is remembered on your phone.

चाँद वाला बटन — गहरा रूप।

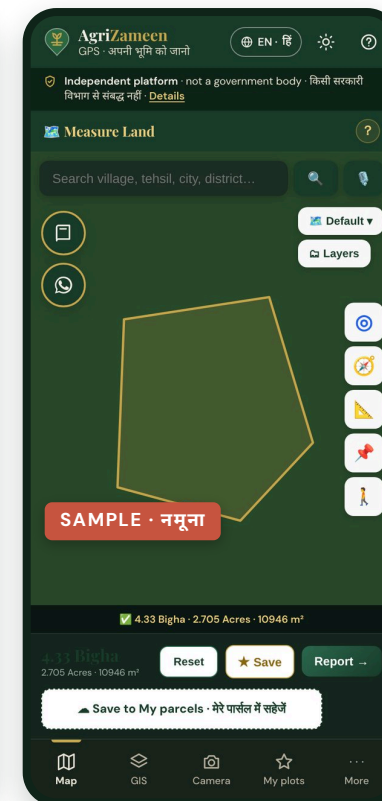

Labelled on every screen

The strip under the header says it everywhere: independent platform, not a government body. The ? button opens help for the screen you are on.

हर स्क्रीन पर: स्वतंत्र प्लेटफॉर्म, सरकारी संस्था नहीं।

Light · हल्का

Dark · गहरा

Tap the corners, read the area

कोने टैप करें, क्षेत्रफल पढ़ें

1 Find the place

Search a village, tehsil, city or district — or speak it with the 🗨️ button. 📍 centres the map on where you stand.

गाँव, तहसील या शहर खोजें — या बोलकर।

3 Read the area

In your state's bigha, with acres and square metres beside it. Nineteen states and "Other" are built in, and the unit follows the state.

राज्य के बीघा में, साथ में एकड़ और वर्ग मीटर।

2 Tap each corner

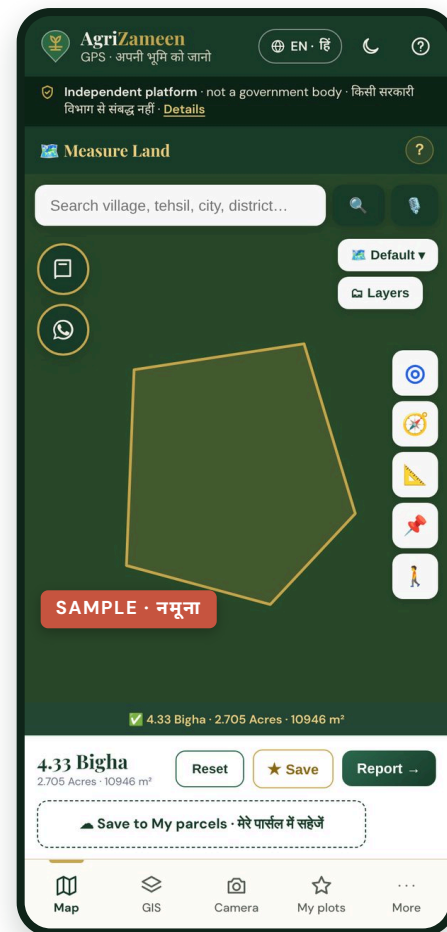

Tap the first point again to close the shape. Undo takes back a mis-tap; Reset starts over.

पहले बिंदु पर फिर टैप करें — आकार बंद।

4 Or walk it

🚶 Walk mode records the edge as you walk, a point about every 5 m. 📏 measures one side; 📌 marks a well, a road edge or a disputed corner.

सीमा पर चलें — ऐप रेखा दर्ज करता है।

SAMPLE outline, 4.33 bigha. On your phone the satellite map loads under it; it is left out of this print.

App-measured areas are indicative, not a revenue record — check them against the Patwari's figure before you act on them.

ऐप का नाप अनुमानित है, राजस्व रिकॉर्ड नहीं — पटवारी के आँकड़े से मिलाएँ।

The GIS map, in a tab of its own

बेल्ट का GIS नक्शा — अब अपने टैब में

The Belt Explorer

The AgriZameen GIS map of the Phulera–Sambhar belt opens inside the app. Layers turns AgriZameen listings, satellite fields and My parcels on or off.

फुलेरा-साँभर बेल्ट का नक्शा, ऐप के अंदर।

My parcels

After you close a boundary, Save to My parcels keeps it in your AgriZameen account — private to you and the AgriZameen team. आपका पार्सल आपके खाते में — सिर्फ आप और हमारी टीम देख सकते हैं।

A listing is an area, never the plot

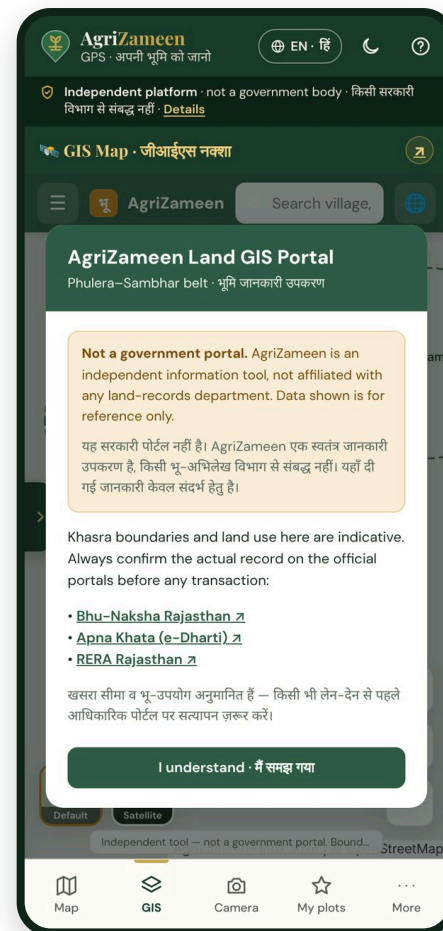

Each listing shows as an approximate area about a kilometre across. Tap its label for the card, then Request details — the seller decides, and never sees your phone number.

लिस्टिंग लगभग एक किलोमीटर का क्षेत्र है — प्लॉट नहीं।

It opens with a notice

Not a government portal. Khasra boundaries and land use are indicative; confirm the actual record on the official portals before any transaction.

सरकारी पोर्टल नहीं — लेन-देन से पहले आधिकारिक रिकॉर्ड देखें।

The notice the GIS tab opens with · GIS टैब की पहली सूचना

Photos that carry their own place and time

फ़ोटो पर जगह, तारीख और समय की मुहर

The stamp

Latitude, longitude, altitude, accuracy, date, time, address, state and the measured area are written onto the photo. Each field switches off with one tap.

हर फ़ील्ड एक टैप में चालू या बंद।

Four styles and a note

Classic, Dark, Light or Gold — and a short note of your own on the stamp. Front or back camera.

चार रंग, और अपना छोटा नोट।

Keep it with the plot

Save the photo to a saved plot, download it to your phone, or share the stamp details on WhatsApp.

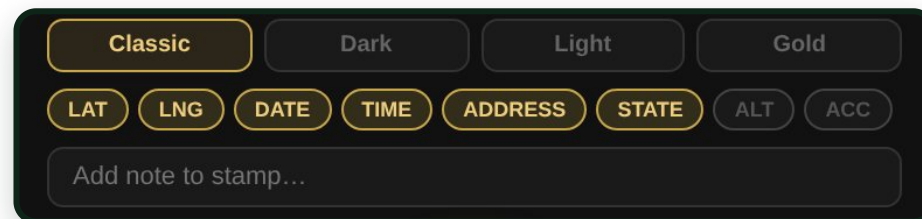

फ़ोटो प्लॉट के साथ सहेजें या WhatsApp पर भेजें।

Coordinates come from your phone's GPS and are approximate. A stamped photo records a visit — it is not a survey.

निर्देशांक फ़ोन के GPS से हैं और अनुमानित हैं — यह सर्वे नहीं है।

The stamp as the app previews it — SAMPLE area; latitude and longitude fill in from your GPS.

Style and field switches under the camera view · रंग और फ़ील्ड बटन

A report for the plot you measured

नापे गए प्लॉट की रिपोर्ट

Summary

State, region, area in the local unit and in acres, soil type, typical crops and water risk for the region — with a crop calendar for Kharif, Rabi and Zaid, and elevation and slope on a tap.

राज्य, क्षेत्र, मिट्टी, फ़सलें, पानी — और फ़सल कैलेंडर।

Said plainly

Soil and water describe the region, not your plot. The app does not measure N-P-K or pH — a Soil Health Card from a soil testing laboratory or Krishi Vigyan Kendra does.

मिट्टी और पानी क्षेत्र के हैं, आपके प्लॉट के नहीं।

Nearby

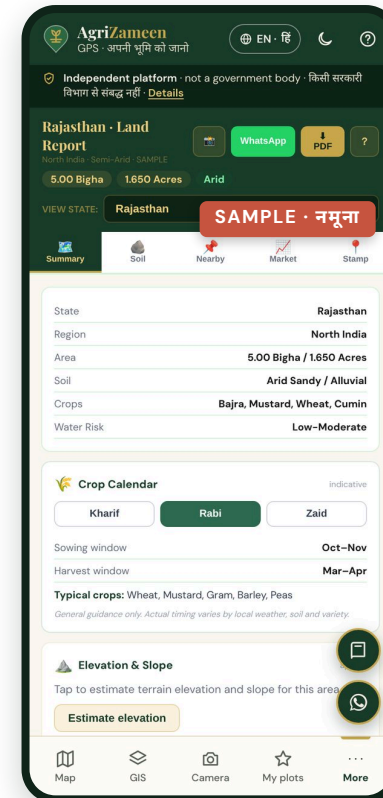

With location on, forests, dams, highways and towns within about 12 km of where you stand.

लोकेशन चालू हो तो लगभग 12 किमी के भीतर।

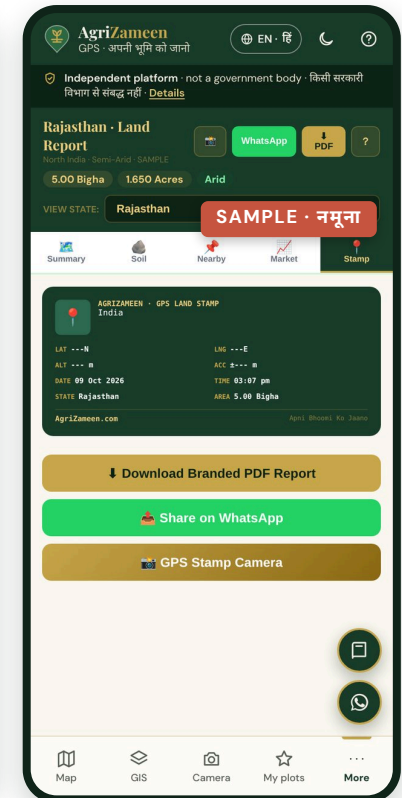

Take it with you

A branded PDF report, Share on WhatsApp, and a Stamp tab that opens the GPS camera.

PDF रिपोर्ट और WhatsApp पर शेयर।

SAMPLE report — Rajasthan, 5 bigha

Stamp tab of the same SAMPLE

Every plot saved, side by side

हर प्लॉट सहेजें, साथ रखकर मिलाएँ

Saved on your phone

Name a plot and it stays in My plots on your device, with a running total of plots and acres. Back up to a file, and restore it on a new phone.

प्लॉट आपके फ़ोन में — बैकअप फ़ाइल से नए फ़ोन पर वापस।

Compare

Tick two or more plots for a side-by-side table: area, acres, square metres, approximate dimensions, perimeter, state and region.

दो या ज़्यादा प्लॉट चुनें — आमने-सामने तुलना।

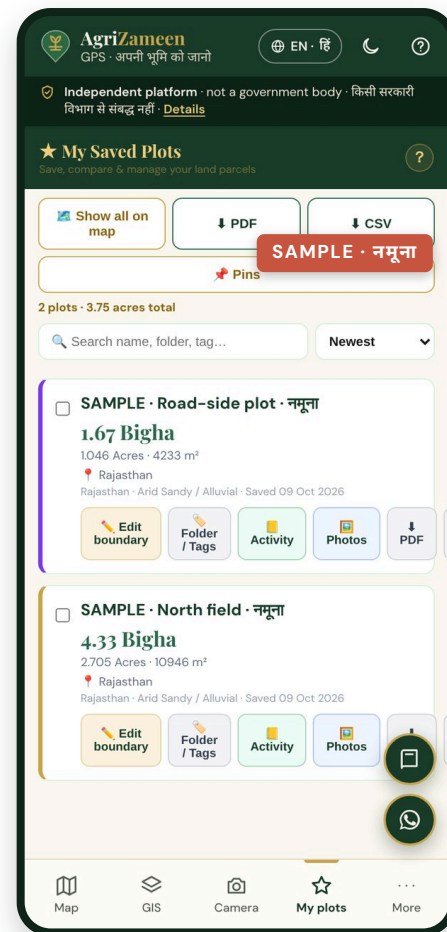

Work on each plot

Edit the boundary, file it under folders and tags, keep an activity diary — sowing, irrigation, harvest — add photos, and save a PDF. सीमा बदलें, फ़ोल्डर, टैग, फ़ोटो, PDF।

See them all

Show every plot on the map, export all as PDF or CSV, search by name, folder or tag, and sort by newest, area or name. Pins have their own list.

सभी प्लॉट नक्शे पर, PDF या CSV में।

Two SAMPLE plots · नमूना

Bigha, acre, hectare — by state

बीघा, एकड़, हेक्टेयर — राज्य के हिसाब से

Convert

Type an area, pick its unit, and read it in the others — square feet, gaj, square metres, acres, hectares and the local bigha. Copy all at once.

एक इकाई डालें, बाक़ी सब में पढ़ें।

Area, Price & EMI, Recent

Work out an area from a plot's sides, a price or loan EMI from a rate you type yourself, and find your last conversions under Recent.

आपकी दर पर क़ीमत और EMI।

Choose the state for bigha

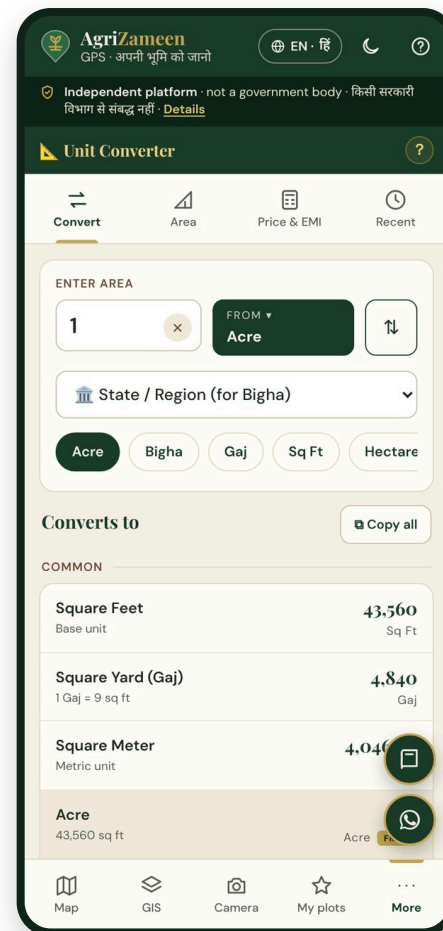

A bigha is not one size across India. Pick the state — and the region, where it differs — before you read a bigha figure.

बीघा हर जगह एक नहीं — पहले राज्य चुनें।

Before any registry

Land units like bigha and biswa vary by state and district. These values are for general reference — for a registry or any payment, verify with the Patwari's records.

रजिस्ट्री से पहले पटवारी रिकॉर्ड से जाँचें।

1 acre, converted · 1 एकड़ बदला गया

The website beyond the app

ऐप से आगे — agrizameen.com

Land for sale

Listings the team has read, each with an approximate map area — never the khasra number or the owner's name. Request details; the seller decides.

खसरा नंबर और मालिक का नाम कभी सार्वजनिक नहीं।

Free tools, no signup

The Registry Cost Estimator, the Land Conversion Guide to the 2026 rural rules, unit converters and land-document decoders.

मुफ्त टूल — बिना साइन-अप।

Sell your land

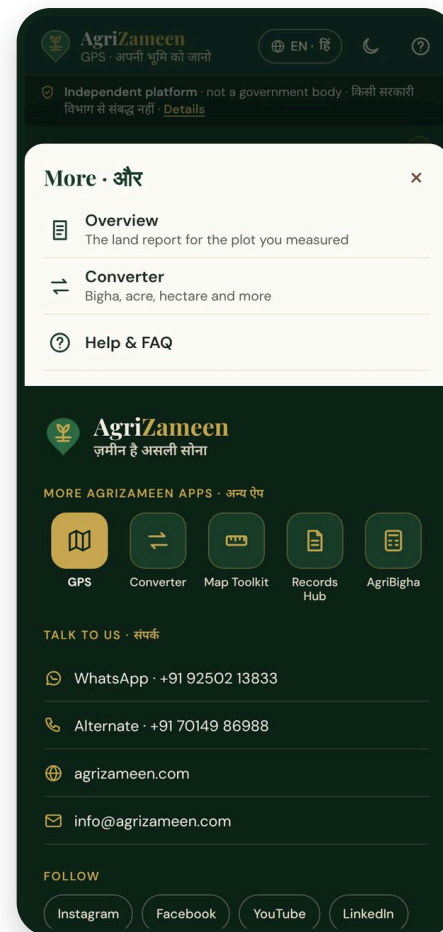

Listing is free; commission only on a completed sale. Send your jamabandi on WhatsApp to the listing desk, +91 70149 86988 — or follow the nine-step Seller Guide.

लिस्टिंग मुफ्त — जमाबंदी WhatsApp पर भेजें।

AgriZameen Academy

Fifty-five lessons across seven levels — from reading a jamabandi to a safe registry.

55 पाठ, सात स्तर।

More → apps and contact · और

Four more apps in the same look — Converter, Map Toolkit, Records Hub and AgriBigha — under More → More AgriZameen apps.

इसी रूप में चार और ऐप — “More” में।

Independent — not a government body

AgriZameen is an independent private platform run by Vision Global Ventures LLP, and is not affiliated with any land-records department. Areas, boundaries, soil and water shown in the app are for reference only.

AgriZameen एक स्वतंत्र निजी प्लेटफ़ॉर्म है — कोई सरकारी संस्था नहीं, किसी भू-अभिलेख विभाग से संबद्ध नहीं।

Before you buy, sell or pay

Verify every figure against the official records, and consult a qualified professional — an advocate for the title, a chartered accountant for the money.

खरीदने, बेचने या भुगतान से पहले आधिकारिक रिकॉर्ड से जाँचें और किसी योग्य विशेषज्ञ से सलाह लें।

ज़मीन है असली सोना · Land is the real gold — if the paper is clean.
