Measure

Tap the corners, or walk the boundary; the area in your state's bigha with acres and square metres. Nineteen states and "Other".

GPS stamp camera

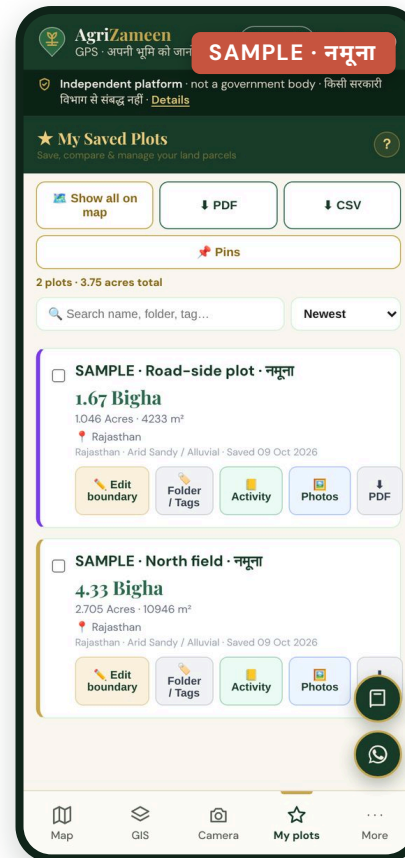

Latitude, longitude, date, time, address and area written onto the photo.

Save and compare

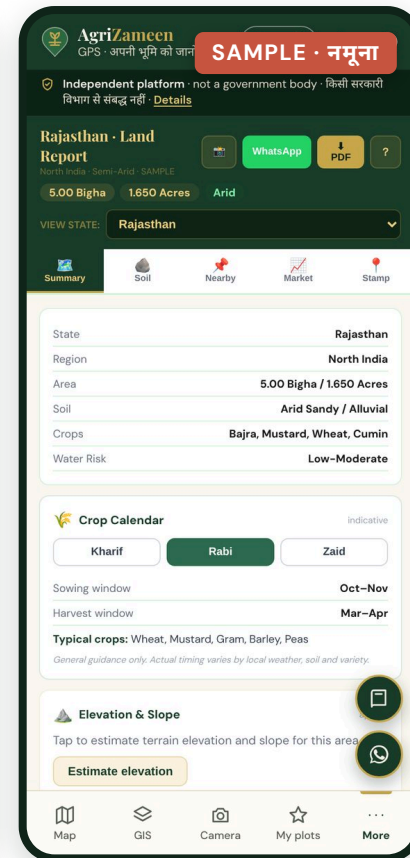

Plots saved on your phone; edit, folders, activity diary, photos, PDF and CSV, side-by-side comparison.

Honest about it

Areas are app-measured and indicative — not a revenue record. A listing on the map is an approximate area about a kilometre across, never the plot.

Measure

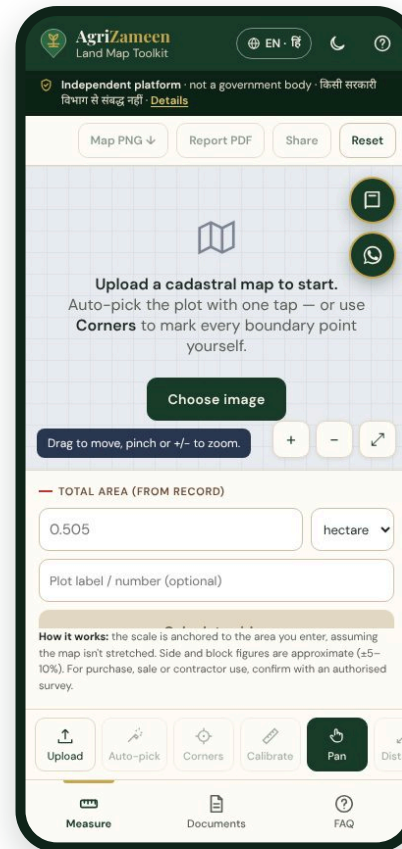

Calibrate a plot map, measure sides and blocks, export a map PNG or a report PDF. Measure runs fully on your device.

Documents

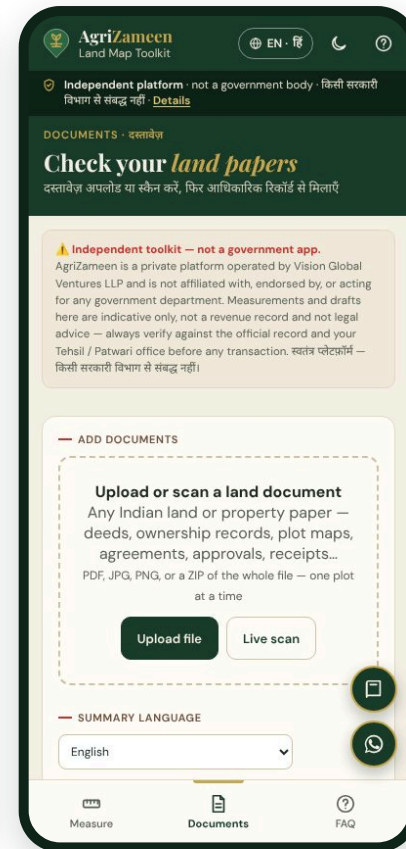

Reads land papers and summarises them; documents are sent to an AI analysis service, as the app states.

Approximate

Side and block figures are approximate ($\pm 5-10\%$) — confirm with an authorised survey.

Five free Android land tools and the AgriZameen app — every one of them also runs in a browser.

Five free Android land tools, plus the AgriZameen app itself, for people who buy, sell or simply own land. No ads and no charge, and no sign-up needed to use the tools — you sign in only to request a listing's details or keep parcels in the GPS app. Every one of them also runs in a browser, so you can try it before you install anything.

Independent, not a government app. AgriZameen is a private platform operated by Vision Global Ventures LLP. None of these apps is affiliated with, endorsed by, or acting on behalf of any land-records department. Records you read anywhere must still be verified on the official state portal (check the address bar reads .gov.in or .nic.in) and at the local Tehsil or Patwari office before you transact.

Which one do I need?

Walking a boundary and want the area: **AgriZameen GPS**. Converting bigha to hectare or acre: **Land Converter**. Measuring a plot on a map without going there: **Land Map Toolkit**. Looking for your state's record portal: **Land Records Hub**. Working out a deal's numbers: **AgriBigha**.

They work offline

The converter and the calculators need no connection at all. The GPS app needs a signal for satellite imagery and for place names, but measuring a boundary you have walked does not. Nothing you measure is uploaded anywhere unless you choose to share it.

What they will not do

None of these apps gives you a legal area, a title opinion or a valuation. An app measures what you walk or draw; the record is what the Tehsil holds. Where the two disagree, the record wins and a licensed advocate is the person to ask.

Land information on this site and in these apps is for due diligence, never a promise of return. Verify every record officially before money moves.
